

# MyGrade

Grade Viewer App

## FAQ

### Sir what is my Account ID and Pass Code?

Your Account ID is the lowercased concatenated form of your School ID number and subject code.

- Examples:

20150037mnis217c

20150037mnit211

You Pass Code is the 7-digit password that we have on your personal Monsta FTP account.

---

### The grade viewer is not working.

This page rely heavily on JavaScript. Be sure to enable it on your web browser.

---

### I got a 5.0 grade :(

Maybe you missed a major exam, a project or a bunch of lab exercises. Please check the grading components again or visit me at our faculty office for clarifications. Remember that you can still comply with the other requirements to pass the subject.

---

### My score on the lab exercise or practical is only half of the total. Why is that so?

It's an indication that you missed the lab exercise, copied your classmate's work or someone copied your work. I still give you a passing score even if you missed it or your work has been duplicated. Please do inform me if I mischecked your lab exercise or

practical.

---

**I still can't access my account.**

It's possible that you are not included in my class list. You can't also access your account if I haven't uploaded your grade on the database server.

---

**Where can I contact you Sir?**

You can send your queries at [mjsolidarios@wvsu.edu.ph](mailto:mjsolidarios@wvsu.edu.ph) or message me on my Facebook account (search me on Google).

---

**Where is my profile picture?**

You don't have a Facebook account, you are not included in your teacher's friends list or your profile picture is too private. I'm unable to fetch it using Facebook's Graph Search.

---

**I would like to report a bug.**

You can post an issue on [this GitHub repository](#).

---

**Is this web app secured?**

Sadly no. I'm using free web services and the app's form fields are present in an insecure (http://) page. This site is only for informing you about your midterm grade. User login credentials are easily stolen here.

---

What is inside?

Cards, GUI cards and Mario.
